

034 Metal Industry d.o.o. celebrates 18 years from its beginning

On the 1st of September, Company 034 Metal Industry d.o.o. celebrated 18th anniversary from its establishment. In 1991 we started as a trading company and our core business was only recycling of non-ferrous metals. Since that day we have added a few more activities, such as: casting of non-ferrous alloys, recycling of ferrous metals, producing of brass parts etc.

For all this time we created an image which is recognizable wider than Serbian borders. Company 034 Metal Industry d.o.o. is attending to continue with the rising trend which we had so far, and to continue with expanding of our capacities especially in Foundry and Recycling division. Doing this, we will do our best to open new international markets such as: copper alloys, zinc alloys and secondary ferrous market.
