

10 years of Foundry

034 Metal Industry d.o.o. this year celebrates its anniversary - 10 years since the establishment of foundry plant. 1991st the trading company started to work, then 2000th we expanded services and began with the casting of aluminum alloys, copper alloys and zinc alloys. 10 years since then, 034 Metal Industry d.o.o. has been supplying with the most important raw material producers of aluminum parts that are intended mainly for automotive industry. From June 2000. when the first aluminium ingot came out from the foundry, and to date, we have become an important business partner of major manufacturers of parts made of aluminum, especially from the territory of the European Union. In the future our company plans to increase the percentage share of exports in total sales and to significantly increase the capacities.
