

New molding line

Company 034 Metal Industry d.o.o. installed new automatic molding line which will have significant influence on faster molding of the alloys.

This line has 2 tones per hour capacity, and it helps us to mold all quantity of the pour from the furnace for less time. An ingot, casted within this line, has weight from 5 to 7 kg. In this way, company 034 Metal Industry d.o.o. stays consistent to its Quality Policy Statement, which says that one of the priorities is constant improvement of production process.

034 METAL INDUSTRY d.o.o.
